## Customer Reference for Base Station MiMo Sector Antennas

In Altnet, we tested RF elements MiMo Sector Antenna, Model SECM590 (5GHz, 90° beam).

We all agreed that the antenna looks very good, the appearance is distinctive and smooth. The waveguide cover is in our opinion very practical feature. With the best quality waveguides used as jumpers, it would be the best solution on the market today. Our field engineers liked the ease of the installation, which is outstanding.

In terms of performance, it is comparable to large Airmax 5G-20-90 Sector Antenna from Ubiquiti. The overall impression is very good, we can recommend this product. Guys in RF elements did great job!

Michal Rybarik, Altnet
